                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        TXNLIKEIKAIASIPTERHFFNVSDEADLLEKAGTIGEQIFSIEGTVQG-GDNPQMEMSQ 369
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            LFNITNGARKNAPKILFLLTDGEKRGDPLGYEDVIPELDREGVIRY---VLGF--GDAFR 276

VLA-2 protein homolog - mouse
C.Species: Mis musculus (house mouse)
C.Species: Mis musculus (house mouse)
C.Date: 13-Jan-1995 #sequence_revision 13-Jan-1995 #text_change 15-Sep-2003
C.Date: 13-Jan-1995 #sequence_revision 13-Jan-1995 #text_change 15-Sep-2003
C.Accession: 844142
R.Edelnan, J.M.; Chan, B.M.; Uniyal, S.; Omodera, H.; Wang, D.Z.; Damjanovich, L.; L. A.Description: The mouse VLA-2 homologue supports collagen and laminin adhesion but A.Description: S44142
A.Decession: 844142
A.Accession: 844142
A.Accession: 848142
A.Residues: preliminary
A.Molecule type: mRNA
A.Residues: 1-1178
A.Residues: 1-1178
A.Residues: 1-1178
A.Residues: 1-1178

Tal437
integral alpha chain SU2 - sea urchin (Lytechinus variegatus)
C;Species: Lytechinus variegatus (variegated urchin)
C;Species: Lytechinus variegatus (variegated urchin)
C;Date: 29-Oct-1999 #sequence_revision 29-Oct-1999 #text_change 21-Jan-2000
C;Accession: Tal437
R;Hertzler, P.L; McClay, D.R.
Submitted to the BMBL Data Library, May 1998
A;Description: Alpha SU2, a sea urchin integrin which binds laminin.
A;Reference number: 221035
A;Accession: T31437
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Molecule type: mRNA
A;Residues: 1-1041 <HER>A;Cross-references: EMBL:AF067658; NID:g3220240; PID:g3220241; PIDN:AAC23572.1
A;Eurction: binds laminin
C;Superimental source: developmental stage embryo
C;Function: binds laminin
C;Superfamily: integrin alpha-2b chain
                                                                                                                                                                                                                                                                                                                                                                                                                                                                    41;

DOMAIN: THE INTEGRIN I-DOMAIN (INSERT) IS A WAPA DOMAIN. INTEGRINS WITH I-DOMAINS OF TEASED CLEAVAGE.
SIMILARITY: Belongs to the integrin alpha chain family.
SIMILARITY: Contains I WWPA domain.
SIMILARITY: Contains 7 FG-GAP repeats.
DATABASE: NAME-EROW; NOTE-CD guide CD1lb entry;

SUBCRIATES WITH BETA-2.
SUBCRIATES WITH BETA-2.
SUBCRIADAR LOCATION: Type I membrane protein.

IISSUB SPECIFICITY: EXPRESED MODERATELY ON MYBLOMONCYTIC CELL
LINES AND SUBSETS OF PERIFHERAL BLOOD LEUKCYTES AND STRONGLY ON
TISSUB-SPECIFICITY EXPLAINER RED FULP MACROPHAGES.
ATHEROSCLEROTIC PLAQUES, AND ON SPLENIC RED FULP MACROPHAGES.
NOTH I-DOMAIN: THE INTEGRIR I-DOMAIN (INSERT) IS A WHY DOMAIN. INTEGRINS
WITH I-DOMAINS DO NOT UNDERGO PROTEASE CLEAVAGE.
SIMILARITY: Contains 1 WPRA domain.
SIMILARITY: Contains 1 WPRA domain.
SIMILARITY: Contains 7 FG-GAP repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    INTERACTION WITH VCAMI.

Sequence homology of the LieA-1 and Mac-1 leukocyte adhesion glycoproteins and unexpected relation to leukocyte interferon.";
Nature 314:3640-542 [1985].
-!- FUNCTION: INTEGRIN ALPHA-L/BETA-2 IS A RECEPTOR FOR ICAM1, ICAM2, ICAM3 AND ICAM4. IS INVOLVED IN A VARIETY OF IMMUNE PHENOMENA INCLUDING LEUKOCYTER-ENDOTHELIAL CELL INTERACTION, CYTOTOXIC T-CELL MEDIATED KILLING, AND ANTIBODY DEPENDENT KILLING BY GRANULOCYTES AND MONOCYTES. MICE EXPRESSING A NULL MOTATION OF THE ALPHA-L STBUNIT CRAN DEMONSTRATE IMPAIRED TUMOR REJECTION AND IMPAIRED
                                                                                                                                                                                                                                                                                                                                                                                                                                                    LEUCOCYTES RECRUITMENT.
SUBBUNIT: HETRRODIMER OF AN ALPHA AND A BETA SUBUNIT, ALPHA-L
ASSOCIATES WITH BETA-2.
SUBCELLULAR LOCATION: Type I membrane protein.
TISSUE SPECIFICITY: LEUKOCYTES.
DOMAIN: THE INTEGRIN I-DOMAIN (INSERT) IS A VWFA DOWAIN. INTEGRINS WITH I-DOMAINS DO NOT UNDERGO PROTEASE CLEAVAGE.
SIMILARITY: Belongs to the integrin alpha chain family.
SIMILARITY: Contains 1 VWFA domain.
SIMILARITY: Contains 7 FG-GAP repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             EMBL; M60778; AAA39426.1; -

ITGAE. musculus (Mouse) SEQUENCE FROM N.A. NCBI_TaxID=10090; Mus

SUBUNIT: HEFERODIMER OF AN ALPHA AND A BETA SUBUNIT. THE ALPHA SUBUNIT IS COMPOSED OF AN HEAVY AND A LIGHT CHAINS LINKED BY A DISULFIDE BOND. ALPHA-E ASSOCIATES WITH BETA-7.
SUBCELLULAR LOCATION: Type I membrane protein. --1

This SWISS-PROT entry is copyright. It is produced through a collaboration between the Swiss Institute of Bioinformatics and the EMBL outstation the Buropean Bioinformatics Institute. SUBCELLULAR LOCATION: Type I membrane protein.

TISSUE SPECIFICITY: EXPRESSED ON A SUBCLASS OF T-LYMPHOCYTES KNOWN
AS INTRA-EPITHELIAL LYMPHOCYTES WHICH ARE LOCATED BETWEEN MUCOSAL
BPITHELIAL CREES.

DOMAIN: THE INTEGRAIN I-DOMAIN (INSERT) IS A VWPA DOMAIN. INTEGRINS
WITH I-DOMAINS DO NOT UNDERGO PROTEASE CLEAVAGE.
SIMILARITY: Belongs to the integrin alpha chain family.
SIMILARITY: Contains I VWPA domain.
DAITABASE: NAME-PROW; NOTE-CD guide CD103 entry;

5 COLLAGEN. IT RECORNIZES THE PROLINE-HYDROXYLATED SEQUENCE G-F-P-G-
B-R IN COLLAGEN.
5 B-R IN COLLAGEN.
6 B-R IN COLLAGEN.
7 SEQUENCE GASOLINE: ALPHA AND A BETA SUBUNIT. ALPHA-1
ASSOCIATES WITH BETA-1.
6 L- SUBCELLULAR LOCATION: Type I membrane protein.
7 L- DOMAIN: THE INTEGRIN. 1-OMAIN. (INBERI) IS A VWFA DOMAIN. INTEGRINS
8 NITH 1-DOMAINS DO NOT UNDERSO PROTEASE CLEAVAGE.
1- SIMILARITY: Contains 7 FG-GAP repeats.
2 SIMILARITY: Contains 7 FG-GAP repeats.
2 SIMILARITY: Contains 7 FG-GAP repeats.
2 SIMILARITY: Contains 7 FG-GAP repeats.
3 SIMILARITY: Contains 7 FG-GAP repeats.
4 SIMILARITY: Contains 7 FG-GAP repeats.
5 SIMILARITY: Contains 7 FG-GAP repeats.
6 SIMILARITY: Contains 7 FG-GAP repeats.
